Flex Visor Carrier

Visor solution for safety helmets and hearing protection. The Safe 2 visor carrier is designed to be combined with safety helmets and visors, with or without hearing protection. The carrier is suitable for helmets without cut-outs for earmuffs or when the helmets earmuff attachment slot is placed aligned with the helmet brim. The Flex carrier is equipped with an extra rubber seal to prevent rain, sawdust and other particles from falling down between carrier and helmet. Read our guides on how to select the correct visor carrier to your safety helmet.

1. Safe 2 Flex Visor Carrier

Article nr: 20901-501

1

Overview

Flex carrier - extra seal and support

The FLEX carrier is equipped with an extra rubber seal to prevent rain, sawdust and other particles from falling down between the carrier and helmet. It is also the best choice of carrier for any helmets with very short or no brim, such as climbing-style helmets.

Quick and easy visor assembly

The face protection system mounts easily to any Hellberg hearing protector as well as safety helmets and stand-alone visor carriers. And it is as easily removed, perfect for when you are switching between different work tasks in noisy environments.

Two positions

A smooth pivot movement to lift the visor up into a firm stand-by position, and back to working position.

Features

- For straight brimmed helmets
- Extra rubber seal against rain and debris
