

PATENTED NEW FOAM

E A R Classic soft earplugs will change the way people 'feel' about foam earplugs, because they feel entirely different. Made of patented new foam, these plugs have a smaller cell structure and feel smoother 'to the touch' than other foam. But that is just the beginning; the foam earplug actually reacts to the wearer's body temperature.

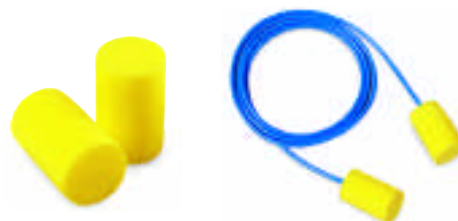

THERMAL-REACTIVE FOAM

These new plugs start out firm enough to make roll down and insertion easy. As the foam warms to the body temperature, it becomes even softer and shapes to the individuals ear canal. This 'shaping' allows the plugs to form an excellent seal against noise (36 SNR) and as time goes on, the foam continues to soften for added comfort.

ULTIMATE PERFORMANCE

E A R Classic soft earplugs feature the tried and tested cylindrical shape - the worlds most popular shape for earplugs. Combine this shape with attributes of the foam, and you get the ultimate in comfort and performance for extended wear earplugs.

Classic soft are available with or without a cord.

ORDERING INFORMATION

CODE	DESCRIPTION	PACKAGED
PR-01-005	E A R Classic soft Corded	200 Pr Per Disp. / 2000 Pr Per Master
PR-01-004	E A R Classic soft Uncorded	200 Pr Per Disp. / 2000 Pr Per Master
FP-01-800	E A R Classic soft 5 Pair	250 Pr Per Disp. / 4000 Pr Per Master

ATTENUATION DATA

Frequency (Hz)	63	125	250	500	1000	2000	4000	8000
