

Product Data Sheet

Air-Fed Chemical Suit Proflair Multi Use

Overview

The Proflair Multi Use suit is a one-piece re-usable suit designed for all industries where protection is required from exposure to chemicals and particulates. Required to be worn with an air hose and belt worn internally, fitted with an audible low flow warning device. Users enjoy the protection of a suit (APF 200) without the need for mask fitting, giving free head movement and wide vision. Air source required.

Features

- Unique high strength, high frequency welded seams with flat profile
- Excellent all round vision through a high quality optically clear visor
- Optimised for active use giving freedom of movement and wide visibility
- Air distribution channels provide increased comfort and reduced wearer stress
- Emergency breather options available for safe egress in the vent of air flow failure
- Hoses with additional reinforcement and built in communications connections available
- Fall arrest harness and hard wire communication entry port options.
