

The Standard Air Hood is an air hood is a re-usable air –line respiratory hood designed for all industries where protection is required from exposure to chemicals and particulates. The air flow is distributed in the top of the hood giving a cooling diffused air flow around the users head. Users enjoy a high level of protection (APF 40), with mask fit testing not required, giving free head movement and wide vision. Facial hair and spectacles can be easily accommodated. around the users head and upper body. Users enjoy a high level of protection (APF40), with mask fit testing not required, giving free head movement and wide vision.

Features

-  Maximum comfort and ease of use without fit testing
-  Choice of visors, hood diameters and shoulder length
-  APF: 40
-  EN 270 & EN 467

Standard Air Hood

Specification	
Material	Natural PVC/PVC Wavelock/PVC Duraskin
Sizes	S-XXL
Type	Compressed air-line breathing apparatus incorporating a hood, loose fitting, reusable
Air Supply	Separate waist belt with air supply hose and low flow warning device
Air Flow	198-226 l/min
Visor	Tested for increased robustness
Shelf Life	Potential useable life of 5 years
Inspection	Biennial storage inspection
In use servicing	Every six months
In use storage	3 point hanging lugs
