

Finite® HD

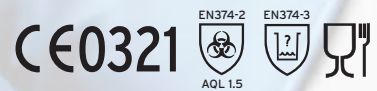

Finite® HD is a blue nitrile, powder free disposable glove compliant to European Standard EN374 (Category III- Complex Design), providing effective splash protection against a wide spectrum of hazardous substances. The Finite® HD is thicker than a standard disposable glove, offering the choice of use as a heavy duty disposable or a lightweight re-usable glove. Its unique nitrile formulation, with tensile strength able to withstand the rigours of continuous use, is soft and sensitive enough for use as a disposable. Nitrile contains none of the proteins found in natural rubber thus eliminating protein sensitisation. The 30cm cuff provides additional protection to the forearm and is beaded, enhancing strength and preventing liquid roll back.

Typically used for:

- Automotive Maintenance & Repair
- Care Home Work • Catering Work
- Chemical Handling • Cleaning & Janitorial
- Engineering Work • Pharmaceutical Work
- Manufacturing & Assembly

Case Quantity:

50 gloves per dispenser
10 dispensers per case

Size	Code	Length
