

## Butochem<sup>™</sup>

Butochem<sup>™</sup> is an unlined butyl chemical resistant glove with a beaded cuff. This glove exhibits the highest permeation resistance to gas and ozone, and provides protection from various ketones, oils, acids and other chemicals. Anatomically shaped for comfort, the soft and pliable formulation results in a highly flexible glove making it extremely dextrous for a glove of its calibre. Butyl gloves do not support flocking material therefore Butochem<sup>™</sup> has been lightly powdered to prevent the hands from sweating and for ease of donning. It has a beaded cuff for additional strength and to prevent liquid roll back. Available in two thickness options for varying mechanical load.

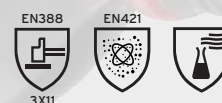

### Typically used for:

- Primary Chemical Processing
- Paint, Varnish, Adhesive & Ink Manufacture
- Disposal of Domestic & Industrial Critical Waste

### Case Quantity:

1 pair per polybag

**CE 0333**
