

# ChemTek™

Maximum protection from hazardous chemicals

Complex Design

When you work with hazardous chemicals you need maximum protection. The new ChemTek™ gloves complete Ansell's line of hand protection products for chemical handling. The ChemTek™ range provides the best resistance to the most aggressive chemicals – without compromising dexterity or comfort.

## Recommended Usage

Ansell ChemTek™ gloves are especially designed for handling hazardous materials, maintenance, sampling, production and unknown exposure during the following activities:

- Chemical manufacturing, processing and handling
- Refining
- Printing
- Automotive/OEM
- Mining
- Aerospace
- Disaster response

## Higher level of safety

Protecting against a wider range of chemicals than traditional nitrile, neoprene and latex, ChemTek™ Butyl and Viton®/Butyl gloves offer superior resistance to the most aggressive industrial chemicals.

- Chemtek™ Butyl offers superior protection against

aldehydes, ketones and esters as well as concentrated mineral acids.

- ChemTek™ Viton®/Butyl offers superior protection against aliphatic, halogenated & aromatic hydrocarbons (benzene, toluene, xylene) as well as concentrated mineral acids.

## Excellent dexterity, comfort and grip

ChemTek™ gloves are surprisingly flexible and provide excellent dexterity. Designed for comfort – with a natural, curved ergonomic shape and soft feel – they offer easy donning and good grip. And the absence of latex proteins means there's no risk of latex allergies. All ChemTek™ gloves are powdered for comfort and easy donning.

## Packaging

36 pairs per carton, individually wrapped with insert (38-514 & 38-520). 12 pairs per carton, individually wrapped with insert (38-628)
