

# GL895 Blue Nitrile PF™

## A soft & pliable nitrile disposable glove

The GL895 Blue Nitrile PF™ is a powder free nitrile disposable glove offering protection against contamination, dirt and potential irritants in low risk situations. The nitrile synthetic rubber that is used to manufacture the GL895 contains none of the proteins that are present in natural rubber eliminating protein sensitisation and is powder free reducing the risk of product contamination. With textured fingertips for improved grip, it is extremely soft and pliable yet still maintains a tensile strength that is comparable to natural rubber. The cuff is beaded, enhancing strength and preventing liquid roll back. The GL895 Blue Nitrile PF™ has an AQL rating of 4.0 and has been tested in accordance with EN1186 making it suitable for food contact.
