

Polyflex® Plus

Dextrous & comfortable with an excellent grip

Polyflex® Plus is a seamless nylon liner with a foamed nitrile palm coating, providing excellent grip and abrasion resistance. Designed to be close fitting, the breathable, seamless knitted liner with elasticated knit wrist provides outstanding dexterity. This, combined with the foamed nitrile palm coating, makes the Polyflex® Plus ideal for those tactile tasks that require the highest level of grip in wet or light oily conditions. This is achieved by the foamed nitrile channelling liquids away from the glove surface, ensuring a safe grip. With its excellent abrasion resistance and liquid repelling properties, this glove is the perfect choice for environments where liquid or light oil is present. Also available on header card for display purposes and allowing for lower order quantities.

Typically used for:

- Component Handling
- General Assembly
- Electronics
- Light Engineering Work
- Scaffolding
- Automotive

Case Quantity:

12 pairs per polybag
120 pairs per case
